

ENVIRONMENTAL POLICY

Cabopol – Polymer Compounds assumes the defence of the environment with the objective of guaranteeing the sustainability of its activity. For this purpose, Cabopol expresses the commitment based on the following guidelines:

- Comply with conformity obligations, regulations, or other requirements in effect.
 - Promoting the adoption of good environmental practices, namely through the establishment of a good internal communication network in this area;
 - Protecting the environment by preventing pollution, identifying and controlling environmental aspects and minimizing the environmental impact of activities, products and services, with the implementation of measures to reduce, reuse, recycle and sustainably use resources.
 - Contribute to the continuous improvement of the EMS in order to improve environmental performance.
